LEA® Standard 200

Your passenger lift up to 1.000 kg at 1,75 m/s

Design according to EN 81-20/-50

STYLISH AND FLEXIBLE FOR RESIDENT BUILDINGS

LEA® Standard 200:

The ideal solution for low- and mid-traffic residential buildings with demanding design and exceptional flexibility requirements.

With its timeless elegance and outstanding efficiency, LER® Standard 200 meets the highest demands in terms of comfort, flexibility and design for residential buildings.

Featuring the latest technology, high-quality materials and an impressive design, LER® Standard 200 offers enhanced comfort for passengers and adds value to residential buildings.

Choose **LEA®** Standard 200 and trust in LiftEquip's expertise.

Due to its flexible cabin sizes, this elevator is the perfect choice for modernization projects that require full replacement.

🚓 made in europe At our elevator manufacturing centers in Germany and Spain

Overview LEA® Standard 200									
Elevator type	Machine room-less, optional machine room								
Passengers	4 to 13 passengers								
Load	320 / 450 / 630 / 825 / 1,000 kg								
Speed	1.0 / 1.6 / 1.75 m/s								
Travel height	Up to 75 m								
Number of stops	Up to 20 stops								
Cabin	41 predesigned cabins / custom-fit solutions								
Door types	Side-opening with 2 or 3 panels, central-opening with 2 or 4 panels								
Door opening width	From 700 mm to 1,100 mm								
Door height	Up to 2,300 mm								
Overhead min. (1.0 m/s)	CH + 1200 mm								
Reduced overhead (1.0 m/s)	CH + 490 / 430 mm (for CH = 2070 / 2200 mm and DH = 2000 mm)								
Pit min. (1 m/s)	1000-1100 mm								
Reduced pit (1.0 m/s)	425 / 550 mm								

The **LEA**[®] Family at a glance

LEA® Standard 100: Pure and efficient

The ideal solution for low-traffic functional residential buildings.

LEA[®] Standard 200: Stylish and flexible

Ideal elevator for low- to mid-traffic residential buildings with demanding design and flexibility requirements. Also perfect for modernising existing buildings.

LEA® Comfort 300: Versatile and smart

Designed for busy commercial and office buildings.

Your advantages at a glance

Space flexibility, efficiency and stylish design in one elevator.

If you are planning a new residential building in the comfort or premium segment, your customers will be expecting a reliable elevator solution with exceptional flexibility and quality. With its adjustable dimensions and a wide range of options, **LEA**[®] Standard 200 adjusts to your needs and fits seamlessly into your building.

LER® Standard is built on good quality and experience.

Elevator type

LEN® Standard 200 has a 2:1 rope suspension, with diverting pulleys below the cabin. The ropes are fastened to guiderails at the head of the shaft. For **LEN®** Standard 200 with a speed of 1 m/s, no car sling is required. **LEN®** Standard 200 at 1.6 and 1.75 m/s requires a cabin with sling.

Machine room-less

The motor is a permanent-magnet synchronous gearless machine. It is located at the head of the shaft on a bedplate fixed to a car guiderail and to the shaft wall. The speed governor is fixed to the other car guiderail.

The VVVF frequency inverter is located in the shaft head.

Machine room

The machine and the VVVF frequency inverter are located in the machine room on top of the shaft.

LEA® Standard 200

Efficient, gearless machine for low energy consumption

Design lines for **LEA**[®] Standard 200 Panels, Ceilings and more

The collection of predesigned cabins of the E and D design lines have been created by expert designers to achieve a wide spectrum of atmospheres.

LEA® Standard 200 combines genuine style with quality materials, such as stainless steel, laminate or glass. This adds to the premium feel while ensuring long-lasting good looks.glass.

Panels

Choose among melamines, laminates and stainless steel in the E design line and decorative glass, laminate or steel in the D design line in our predesigned cabins.

Characterised by fresh and natural colour combi-nations, the E design line offers a great choice of predesigned cabins in stainless steel or high-quality laminates and melamines.

E32

Design line D

Geared to high-end residential buildings, the D design line's range of predesigned cabins offers great versatility. They represent a qualitative step up in materials and interior finishes, using either patterned stainless steel, exclusive laminates or decorative glass.

D32

Floors

Concrete Light Grey Vinyl

Concrete Dark Grey Vinyl

Eminent Grey Vinyl

Choose from a wide range of hard-wearing vinyls or Robust stainless steel handrails to place on rear or side a custom flooring (e.g. marble) for a more exclusive walls. Straight fitting for E design line and sloped fitting design. You have the option to supply your own flooring for D design line. (recess ≤ 25 mm).

Mirrors

Choose the partial-width and partial-height silver safety mirror for the E design line or the full-width and full-height silver or smoked safety mirror for the D design line. The cabin is also available with fullwidth and mid-height safety mirror or without a mirror in both E and D design lines.

Without mirror

vary from the original in color and material. Patterned samples not to scale. Consult your LiftEquip sales representative about our cabin design.

Ceilings

Select from a wide range of lighting styles and different colours with direct or indirect lighting to create the desired atmosphere in your cabin. In addition, vandal-resistant ceilings are available in both design lines.

Main Components

Scope of Supply and Planning Information

	e i	EN81- 20/-50 -conform
PMC145-3		
		PMC125

Frequency inverter

==: F300 M600

Gearless PMC125 resp. PMC145-3

The synchronous gearless PMC125 resp. PMC145-3 are one of the most compact machines and is perfectly suited for deployment in the **LEA**[®] Standard 200 elevator system with and without machine room.

High efficiency

brake release

Inverter E300/M600

and power choke

Without travel contactors

Stored motor parameters

lubrication

machines.

Low noise as there is no forced ventilation and very smooth running

Anti-friction bearings with life-time

The power-vector-controlled LiftEquip

frequency inverter is optimised for the

Inverter E300 with power filter

PMC125 resp. PMC145-3 synchronous

Brake resistor in a separate housing

Rapid commissioning via Plug&Play

- Safe and comfortable electromagnetic
- Suited for energy recovery
 - Brake system against overspeed in accordance with EN 81-20 /5.6.6 and against unintended movement of the elevator car in accordance with EN 81-20 /5.6.7
 - UCM verification using the safety brake of the machine and considering the switching times of the control system
 - Rope guard in accordance with EN 81-77 up to earthquake category 3

- Emergency power mode possible in the event of a power failure via UPS (uninterrupted power supply)
- Integrated speed monitoring in conjunction with suitable control system
- Parallel interface and DCP03, DCP04
- Fully regenerative in conjunction with M600

LEA® Standard 200 is a mechanical kit for an elevator that can be combined with any control system available on the market and the associated control and display elements. The kit is based on a type-tested overall system in which the safety-relevant components must be used and integrated into the control system. The elevator must be brought into service by individual acceptance

Not included in the scope of supply are:

Control box of the control system

possible.

- Control system and control box with measures for rescue of passengers Operating and indicator elements
- External control panels
- Mounted resp. built-in control panel in the elevator car
- Emergency call system
- Car distribution box
- Travelling cable
- Shaft selector
- Shaft wiring and shaft lighting
- Inspection control and emergency stop switch
- Integration of the inverter
- Connection of the car lighting and the overload sensor
- Load measurement for overload
- emergency light

All of the above components must be provided by the installation firm and/or a control system supplier.

Standard / - Not available / c.e. Contract engineering

The control box with control system is not included in the scope of supply. It must be provided by the installation firm. The control box is mounted preferably in the top landing of the entrance area. Installation in the landings below this is

The nearest landing door must be located within calling distance of the control box and be visible from the control box. If the control box is installed in an adjoining room, the room must be equipped with an intercom system in accordance with EN 81-20, Section 5.12.3.2.

Legal information

The LEA® Standard 200 elevator system has been granted an EU Type Test Certificate in accordance with Appendix IV, Module B, of 2014/33/EU Directive. Before the commencement of operation, the installation firm must have the elevator system per inspected / approved in an individual inspection with danger analysis. The existing EU Type Test Certificate can be used as the basis for this. During the planning phase, please consider all applicable regulations stipulated by the relevant notified body and all applicable national regulations. Patents have been granted for the LEA® Standard 200 elevator system. On an order-related, LiftEquip will issue a quota licence.

On the latest stage of technology

The ${\tt LGR}^{\otimes}$ Standard 200 complies already with the new elevator standard EN 81-20/-50. So you are technically on the safe side.

Reducing energy consumption

This well balanced system and LED lighting option enables the **LEA**[®] Standard 200 to make an obvious contribution to reducing regular operating costs and CO₂ emissions.

Energy recovery

The deployment of the E300/M600 frequency inverter with integrated power regeneration can further enhance the overall efficiency of the installation. By taking account of the usage category in accordance with VDI 4707, energy efficiency class "A" can be achieved.

Technology with a secure future

Quality Made by "LiftEquip": on a level with international standards and appreciated worldwide. The main components drive, inverter and doors are made in Europe.

Low-noise ride quality

The deployment of our high-quality and perfectly balanced components makes **LER®** Standard 200 a very quiet and comfortable elevator system.

Environmentally friendly production

Throughout the production of the **LEA®** Standard 200, we ensure that the environment is protected.
